Client
MTM Ship Management Pte. Ltd.

Industry
Maritime

Location
Singapore

Challenges
Traditional email solutions was not able to prevent email attacks effectively

Key Benefits
+ Massive Reduction in Spam
+ Simple, easy-to-use interface

Background

MTM Ship Management Pte Ltd, was founded in 1988 in Singapore to manage a fleet of chemical tankers owned and/or bareboat chartered by the MTM Group. Since then MTM Ship Management has progressed into competitive ship management for owners based in Japan, Hong Kong, Indonesia, USA and United Kingdom.

Challenges

COVID-19-related attacks during 2020 capitalized on fear and uncertainty, leveraging trusted entities and using spoofed and compromised accounts to scam recipients, steal credentials or install malware which is a global challenge, especially with employees largely working from home and a daily inundation of information related to the pandemic, attackers saw multiple areas of vulnerability and they took swift advantage of them.

Solutions

The business challenges that led MTMSM to evaluate and ultimately selected Green Radar to protect their email because Green Radar has:

■ A all-in-one enterprise class email security solutions to protect against spam, virus, malware, spoofing emails, phishing and other email-borne attacks.
■ Local SOC and security expert team provide prompt response when customer require additional email security support, without language barrier and time lag issue
■ Local presence combined global and local intelligence

Green Radar grMail works very well for small to large enterprises who want someone to help protect against the deluge of spam, malware, spyware, macros, phishing, and crypto locking junk that is flying all over the internet these days.

Mr. Li Ming Quan, Head of IT
MTM Ship Management Pte. Ltd.

Results

"We take advantage of many of its powerful features. Overall, it has proven very effective and reliable for us, the security expert team in Green Radar are very helpful as well!" said Mr. Li Ming Quan, Head of IT, MTMSM. Green Radar has an array of rules that weed out events trying to performs multiple security functions, including blocking spam, scanning and removing malicious content, prevent impersonated emails and phishing prevention. It also detonates and checks out various attachments for malware, macros and other like rejecting email when the domain is not found.

Other advantages include:

- Very straightforward and well documented setup
- Users can whitelist & blacklist unusual email address as well
- Good rule set for tailoring it to our needs
- Significant reduction on the volume of spam received
- Extremely reliable and virtually no down time
- Prevents any malicious links from getting through and even obfuscates to real link until it is proven safe
